- ✚ Over 35 years experience
- ✚ Never a product failure or recall
- ✚ Successful evacuations during 9/11
- ✚ FDA Registered
- ✚ Exceeds fire safety requirements and emergency response guidelines established to support the Americans with Disabilities Act

*Additional assistance and practice is recommended for heavy passengers

What are your current emergency evacuation plans?

How will everyone escape?

- Most people at some time during their lives will have a disability, either temporary or permanent, that will limit their ability to evacuate on their own.
- **FACT:** More than one in five Americans have some type of disability.

Waiting for first responders

- Waiting with the person with the impairment for first responders should be the last choice in an emergency.
- **SECONDS COUNT:** There is no way of predicting how long an area of safe refuge will remain safe.

Can the elevators be used?

- Restrictions are imposed on the use of elevators during some types of building emergencies.
- Elevators stop working when an alarm is activated.

Mobility impairments

- Anyone with a mobility issue will be unable to evacuate safely unless proper evacuation equipment is provided.

Other impairments and multiple impairments

- Anyone at anytime might need the assistance of evacuation products in an emergency.
- Broken bones, illness, trauma, pregnancy, heart or lung condition, panic attack, arthritis, neurological diseases and rheumatism can all be an impairment to evacuation.
- Reduction in overall ability is also experienced by people as they age. People of extreme size or weight (Bariatric) often need assistance as well.

Evac+Chair® 300H

Evac+Chair® 500H

Evacuation Sleds

ENABLING THE MOBILITY IMPAIRED TO 'SLIDE TO SAFETY'

ResQme®

Product Overview

Quick and easy to prepare for evacuation, allows ONE person to safely transport another in emergencies. Easily moves over ANY surface, across floors and down stairs, It is the ONLY Mat that easily adjusts to the passenger's size (one size fits ALL). Soft-absorbing head pillow reduces head movement going down stairs. Long towing straps at the head and feet for easy maneuvering.

Key Features

- Pulling Straps at both ends
- Head pillow for comfort and protection
- Will slide on carpet, tiles vinyl and concrete
- Can be pulled by one person
- Strong 4" wide velcro straps to secure the person being rescued
- Wrist/Arm strap to stop hands and arms from flaying out of control
- Can be used for children and adults up to 6'6" tall
- Base board to protect the person from hitting door frames etc., when going around corners

ResQmat®

Product Overview

The ResQmat® is the perfect solution for the swift emergency evacuation of persons who are mobility impaired. UNROLL STRAP and GO. The ResQmat is used ALL over the world in Hospitals, Nursing Homes, Retirement Homes, Assisted Living, and Ambulance Companies....ANYWHERE!

Key Features

- Quick and Easy to prepare for evacuation
- Allows ONE person to safely transport another in emergencies
- Easily moves over ANY surface across floors and down stairs
- ONLY Mat that easily adjusts to the passenger's size. (one size fits ALL)
- Soft-absorbing head pillow reduces head movement going down stairs
- Long towing straps at the head and feet for easy maneuvering

ResQpod®

Product Overview

The ResQpod is an evacuation board designed to help evacuate non-ambulant people or people who may not be able to walk down stairs in an emergency. This high-performance evacuation board can quickly and safely get children and adults to safety. The ResQpod can be used in office buildings, theatres, libraries, hospitals, schools, and many other facilities. Additionally, this evacuation board comes with a lifetime warranty!

Key Features

- Long pulling straps located at both head and feet to allow for multiple users
- Secure body protection which completely encloses the upper body
- Heavy duty hook and loop for increased passenger safety
- Impact absorbing pillow for added head protection when transporting down stairs or across rough terrain
- Glideable plastic board corrugated plastic board allows for excellent heat insulation preventing injury, plus removing the necessity to unroll every few months to prevent the plastic keeping its shape
- Adjustable straps curl the ResQPod around the feet, allowing it to fit all sizes

Rescue Sheet

Product Overview

The Rescue Sheet is widely accepted as a vital aid in the rapid evacuation of non-ambulatory patients during emergency situations. The Rescue Sheet is located permanently and unobtrusively under the mattress and does not interfere with bed making. The patient is rescued with their bed mattress to offer protection under the patient, especially when going down stairs.

Please Note: Also Available for Vinyl & Carpet

Key Features

- Permanently in place between the mattress and bed frame
- Fits all bed models and mattresses
- Ready for immediate use
- Long straps located at the head and feet for easy maneuvering
- Adjustable wrap around straps for safely cocooning the patient
- Heavy duty construction for maximum efficiency
- Designed to enable one or more persons to evacuate a person in their mattress during an emergency

Accessories

Comfy Seat (300H, 500H, 600H)
A cushioned seat which provides additional comfort and support by clipping to the seat frame of the EVAC+CHAIR® and can be purchased as a retrofit.

Anti-Theft Alarm Device

The Anti-Theft Alarm device battery-operated siren which gives out an audible alarm when the EVAC+CHAIR® is detached from its housing.

iEvac®Smoke

The iEvac® protects against by-products of combustion including carbon monoxide and hydrogen cyanide, as well as other chemical and biological agents.

Secure Steel Cabinet

A 20 gauge galvanized steel storage cabinet. Has a wide manual door, with nonlocking paddle handle, for easy access and quick removal (**Optional locking handle**).

Evac+Chair® Stand

A self standing support suitable for mounting the Evac+Chair avoiding the need for wall mounting brackets. Internal use only.

Patient Carrier Seat

A portable transfer device for lifting incapacitated persons from a wheelchair into or out of an EVAC+CHAIR®, where self-transfer is difficult.
